

Dear Authors of the Poster Session,

The organizers of SIITME would like the papers presented in this session to have maximum impact on conference participants. To this end, a presentation format has been developed to ensure very high visibility of the work you present.

We ask that you prepare the following materials (items in red should be sent to cristina.marghescu@cetti.ro before the conference - by October 10):

- **an e-poster to be displayed online in the SIITME 2023 website gallery (can be a digital version of the physical poster),**
- **a physical poster (format details below) to be displayed on-site in Craiova,**
- **a video presentation (recorded) of maximum three minutes that will be included in the gallery on the SIITME 2023 website and broadcast on site in Craiova.**

Please refer to the following section for more details:

- (a) **Before and during the conference:** a poster gallery will be available for all who register for SIITME2023, containing both an e-poster and the recorded presentation. The two files, the poster and the recording, should be sent to cristina.marghescu@cetti.ro by October 10. The e-poster should be a JPG, PNG or PDF file with the name IDXXX_Posters_Autorname_SIITME2023. Although any size can be used, keep in mind that participants will be viewing the posters on their computer screens. We recommend that the posters be readable at full screen width without zooming. No specific template is required, but it is recommended that you include contact information.

The short presentation should capture the interest of the audience and convince them to come to the poster during the conference to discuss further and share information. Presentations should be no longer than 3 minutes and should be in AVI or MP4 format. The file should be named IDXXX_VideoPitch_AuthorName_SIITME2022 (where IDXXX stands for the paper ID). You can use slides (PowerPoint or PDF, preferably 1280×720 or 1920×1080 in 16:9 format), which should not be overloaded with information. You can use animations, annotations, “spotlight” as well as a video of yourself, but make sure the recording looks good to the audience and is not too cluttered. It is a good idea to include a picture or video of the presenting author(s) in the video clip.

- (b) **During the conference:** papers will be included in the three poster sessions according to the program posted on the conference website. The session will consist of the poster pitch, followed by an approximately ten-minute discussion in front of the poster with the evaluation team appointed by the organizers. After the pitching session, you should be present for the evaluation of your poster and for further discussion with people interested in the topic you are addressing.

All poster authors are asked to bring a printed poster to the conference venue, which will be displayed on a special board. The poster should be printed in portrait format (1:1.41) and the recommended size is no larger than A0. Although any size can be used, keep in mind that attendees

will see the printed poster on the board. No specific template is required, but it is recommended that the paper's conclusions, key references, and acknowledgements (if any) be present.

We look forward to meeting you at SIITME 2023!
